

NetLabels

OVERWHELMED WITH THE OLD WAY OF LABELING FILES?

If you are still stockpiling rolled labels, name labels and year labels, or if you are ordering folders with pre-applied labels, then NetLabels can help improve your filing system while saving you time and money. NetLabels enables you to print color-coding, text and bar codes all on one easy-to-apply label, right from your own computer and any color printer. Don't change the way your files are labeled - change the way you label your files!

SIMPLIFY FILE LABELING

NetLabels makes labeling easy and enables you to get your folders labeled exactly the way you want. NetLabels eliminates the need to bulk order pre-labeled folders or stockpile individual labels on rolls or sheets, because when you need to make-up folder(s), you can quickly and easily print the label(s) you need, with all the information for each folder on a single label. What a relief! It's quick, easy and efficient. It's the 21st century way of doing business. NetLabels can be accessed from the Internet on an as-needed basis, or NetLabels can be installed on your own computer, network or intranet. NetLabels saves time and money by streamlining file labeling.

MATCH YOUR EXISTING SYSTEM

With NetLabels, you can match the colors of your existing color-coded system and the arrangement of the labels on your folders. You simply print out a label from your own computer using any color ink jet or laser printer. Our easy-to-apply label applicator ensures that the label goes on your folders easily and quickly...in the right place every time! With NetLabels, you have the option of typing in information, using a spreadsheet, or opening data files saved from your own computer system to print one or multiple labels accurately and with ease. With NetLabels you match your existing filing system colors and label alignment.

USE THE INTERNET OR INSTALL NETLABELS ON YOUR OWN COMPUTER, TYPE IN LABEL INFORMATION OR OPEN DATA FILES SAVED FROM YOUR HOST APPLICATION/DATABASE AND PRINT AND APPLY LABELS USING YOUR EXISTING (OR ANY) INK JET OR LASER PRINTER. NETLABELS GIVES YOU EVERYTHING THAT YOU NEED TO PRODUCE A HIGH QUALITY LABEL - RIGHT FROM YOUR COMPUTER. IT'S THAT EASY!

CHANGE THE WAY YOU LABEL YOUR FILES.**

STATE OF THE ART

NetLabels Overview

NetLabels enables you to print out one-piece file folder labels with color-codes, variable text and bar codes. You can easily print labels by typing label information or by opening data files from your own computer, using any printer that you desire. The old way of buying labels on sheets or rolls and applying them one-at-a-time is expensive, time consuming and error-prone. The old way of ordering labels pre-applied to a folder is expensive, they must be ordered in bulk and the labels do not have the variable data identifying what the label/folder relates to. NetLabels optimizes the way that you label your file folders and gives you everything needed on a single label, saving you time and money while improving your filing system.

1

Type

in your label information or open data records from your computer to print label(s).

2

Print

out the label(s) on any inkjet or laser color printer.

NetLabels Internet

Print from any computer with Internet access, from unlimited locations, at any time – without installing any software and with no special hardware requirements. You can have convenient, on-demand label printing on an as-needed basis from the Internet by simply accessing and using NetLabels at www.netlabels.com right from your browser! Your data never leaves your computer or goes over the Internet, and NetLabels employs advanced security features, to ensure that your file information remains confidential. Upgraded versions of NetLabels automatically load each time you log-on, eliminating costly upgrades and tedious maintenance schedules. When using the Internet version of NetLabels, no technical support contract is required and there are never upgrade fees.

LABEL PRINTING

NetLabels Local Versions

NetLabels can be installed on individual computers and saved as an icon on the computer screen, so that labels can be printed without utilizing the Internet. With a single NetLabels license, you can install the software and label design on multiple stand-alone machines at no-additional cost. NetLabels can also be installed on a Network, Intranet, or Extranet, so that the software can be accessed locally from any machine linked to your computer system. This allows unlimited users without user or seat license costs for software or for technical support and upgrades. NetLabels can also be integrated seamlessly with your host database/application software via a 'command line interface', allowing you to print labels from your software application without using or seeing NetLabels screens.

3

Peel

the label and apply to any style file folder that you choose.

4

Use

the folder and file it in your filing system - colors match and line up straight!

NetLabels AutoPrint

NetLabels AutoPrint is a totally seamless and automatic label printing system. The software uses a data-interchange routine that continuously 'polls' and searches your computer system for new records and imports them to NetLabels. The records/data imported from your system are compared to a database of all labels previously printed, to avoid printing duplicate labels for records that already exist. Labels can then print automatically without the user having to do anything at all, or labels can be printed on-demand by clicking an icon that shows how many labels are ready to print. Replacement, volume or other incidental labels can also be printed one-at-a-time by opening a record from the database or typing label information.

SIMPLIFY YOUR FILE LABELING

USE YOUR PC, PRINTER & NETLABELS TO MAKE FILE PREPARATION A PLEASURE

NetLabels makes everything simple. Now you can eliminate stockpiling individual labels or ordering pre-labeled folders in bulk, because when you need to make up a folder, you can print and apply just one label for that folder. What a relief?

With *NetLabels*, you don't change the way your files are labeled, you change the way you label your files. It's quick, easy and efficient. It's the modern way of doing business.

NetLabels can be accessed to print labels via the Internet or through installation on your computer.

NetLabels saves time & money by streamlining file labeling.

With *NetLabels*, you can match the colors of your existing color coded system and the arrangement of those labels on your files. You can print out a single label or a batch of labels using your PC and color printer (laser or ink jet).

Our easy-to-use label applicator ensures that labels go on easily, accurately and quickly...in place every time!

With *NetLabels*, you have the option of typing in label information to print a single label, or you can open a file saved on your own computer system to print a batch of labels.
